MUSIC

*The American Library Association announces
two books of great distinction
in the field of music.*

**Historical Sets, Collected Editions, and
Monuments of Music; A Guide to Their
Contents. Anna Harriet Heyer. 496 pages.
Cloth, \$10.00**

A UNIQUE bibliography of published music. The major collections of music and definitive editions of individual composers' works are listed in a single alphabet. Each entry gives contents as well as the usual bibliographic information. There is a separate index of composers and general subjects. Miss Heyer—a music librarian and musicologist—is the author of two earlier music bibliographies. Her new work will be an essential reference tool and selection guide for all music libraries, a significant aid to musicians and musicologists.

**Code for Cataloging Music and
Phonorecords.
Music Library Association and the
A.L.A. Division of Cataloging and
Classification.
84 pages. Paper, \$2.25**

THE FIRST compilation in book form of all the cataloging rules that affect the music collection. Chapters on entry, descriptive cataloging of music, cataloging of phonorecords and rules for filing are based on existing material in the Library of Congress *Rules for Descriptive Cataloging* and A.L.A. *Cataloging Rules for Author and Title Entries*—re-examined, rewritten in detail and assembled in a single volume for the convenience of music librarians. They will also welcome the completely new chapter on simplified rules.

*You may order these important books from your
usual supplier or direct from:*

Purpose:

**To keep your research people
fully informed
without drowning them**

Let us face it. Advanced technical literature is rarely read, in the same sense that a novel or the front page of a newspaper is read. It is published so that its content of information shall be available to others when, as, and if needed. The great bulk of it is for reference. To publish, by traditional techniques designed for wide readership, material that only a relatively few specialists will actually *read* is a luxury that is now impeding the diffusion of scientific knowledge which pours forth in ever-rising volume.

Therefore, the age of microprint literature is coming in. With as many as 68 standard periodical pages reproduced on a single 3" x 5" file card, here is an ideal medium for literature that hundreds or thousands of people need to have available but that only a handful will read immediately upon publication. When needed, the reading is done comfortably and at larger than original size on a device like the Kodagraph Microprint Reader.

Several publishers offer extensive lists of periodicals and reference works in microprint card form. They also offer publication service for new literature in this form. For names and addresses, write Graphic Reproduction Division,

LIBRARY STANDARDS

ACRL MONOGRAPHS No. 20

College and University Library Accreditation Standards—1957

The newest regional and professional library accreditation standards are now available in this invaluable guide for college and university administrators and librarians. Colleges already accredited need to remain informed of changing standards. Colleges seeking accreditation must be familiar with these requirements. For the first time in years, these standards are brought together in a convenient package, where they may be examined, compared, and applied to specific problems.

THE KEY TO LOWER MAGAZINE BINDING PRICES

CRITERION

Hertzberg-New Method is happy to have been able to pioneer and develop another big forward advancement in library binding. Because of standardized operations and instructions it is now possible to produce superior high quality magazine binding at greatly reduced binding prices.

L. E. Hertzberg

There is one set price for CRITERION, the only extra charge is for library imprint. Otherwise such things as hand sewing, extra thickness, or call numbers are all included in the initial cost. To afford you even greater savings, CRITERION prices are set up on a graduated scale to correspond with the number of CRITERION journals you have bound each year.

CRITERION demand and popularity continues to grow at a rapid pace. If you bind magazines and still do not have the complete CRITERION story, *It will pay you to contact us today.*
